Getting Started Checklist

Spencer Smith

August 18, 2025

The following checklist is relevant when starting a new project in the SE capstone course.

• Form team and select project
\Box Find like-minded team-mates with similar goals
☐ Select a project (see the list of Potential Projects)
☐ Use the capTemplate template (green button). Do not forly the template repo and do not start your own repo from scratch.
☐ Your project name (as used in your documentation, and in you GitHub repo link) identifies the project in some way. The project name should not be a generic name, like capstone.
☐ Select initial extras
$\hfill\Box$ Create a pull request to modify TeamComposition.csv
